

H.M SHIHAB

Dhaka, Bangladesh | shihab2305341402@diu.edu.bd | 01631601746

Full stack developer with about 4 years of hands-on learning experience building PHP & Laravel and MERN stack web apps, AI chatbots, and small data analysis projects. Comfortable working across the stack, from database design to deployment. Currently finishing a BSc in Software Engineering and looking for internship/entry-level opportunities.

SKILLS

Languages: C, Python, PHP, JavaScript, Java

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, PHP, Laravel, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Data/AI: Python, NumPy, Pandas, Matplotlib, Seaborn, Streamlit

Other: Git, Linux, Windows, API integration

PROJECTS

PHP & Laravel Apps

- **EduFlow** — AI-powered, multi-tenant attendance management SaaS for schools and universities with face recognition, liveness detection, and keyword verification (Laravel 12 + React + FastAPI/InsightFace).
- **Adalat Sathi** (আদালত সাথী) — legal case deadline manager for Bangladeshi lawyers with server-side case limits and push/SMS deadline reminders (Laravel 12 + Flutter).
- **WaaS Platform** — Website-as-a-Service SaaS letting small and medium Bangladeshi businesses build professional websites with no coding (Laravel 13 + React/TypeScript).
- **HustleHood BD** — business platform with user auth, product listings and selling.
- **Artists Gallery (PHP backend)** — CRUD operations and API work on the server side.

MERN Web Apps

- **Portfolio Website** — personal portfolio with responsive design and animations.
- **Mozammels Gallery** — full-stack gallery app with image management and admin panel.
- **Adv** — a MERN stack project.
- **Fun Portal** — social platform with user auth and interactive features.
- **My App** — MERN stack app.
- **Mental Health Symptom Triage** — web app for mental health assessment with symptom analysis.

Data Analysis / ML

- **Data Cleaning & Preprocessing Pipeline** — ETL scripts for cleaning and visualizing large datasets.
- **PNPMS Project** — healthcare data analysis.
- **Data Analysis Project (Pandas)** — stats and visualization with Pandas.

AI Chatbots / Healthcare

- **Dengue Symptom Triage Chatbot** — LLM-based triage system for symptom analysis and severity.
- **German Learning Bot** — conversational language-learning chatbot.
- **CS Bot** — a CS help chatbot.

EXPERIENCE

Full Stack Developer — Self-Directed Projects

About 4 years of hands-on learning experience building full-stack apps, focused on:

- MERN stack and Laravel development with REST APIs and real-time features
- Backend integration and database optimization
- Deploying applications end-to-end
- AI chatbot development and LLM integration

EDUCATION

BSc in Software Engineering — Daffodil International University (DIU), Dhaka (2023 – Present)

HSC — Sonar Bangla College (2020 – 2021)

SSC — Ibn Taimiya School & College (2018 – 2019)

ADDITIONAL SKILLS

- Competitive programming — active on LeetCode and HackerRank
- API development & integration — REST APIs, third-party integrations, auth systems
- Deployment — Vercel, GitHub, basic Linux server management
